

## Artifacting Sample

All non-tagged elements need to be placed to <Artifact> containers by standards. “Artifact Untagged” command ensures elements present within content panel, not included in the tag tree, are nested appropriately within <Artifact> containers.

Table Example 1

Document language and style	Number of pages	Translated Y/N
<b>German</b> - Novels, straight text files	17	✓
<b>Spanish</b> - Memos, annual report summaries, letters	46	✗
