

Here's just some placeholder text. The actual test is about the role mapping, visible in Acrobat. The PDF file is to be manually modified to create test conditions.

Welcome to the PDF/UA Foundation

The PDF/UA Foundation is a non-profit organization focused on being the definitive place on the internet to find the latest and most accurate information about what an accessible PDF is along with how to create, read and test them.

The PDF/UA Foundation is committed to ensuring the best end-user experience for the world's most widely used document format. We will be creating content over the coming weeks and months to help educate end-users and authors about the latest techniques and tips to ensure the best reading experience possible. We also want to debunk some of the old myths about why PDF was perceived as inaccessible before.
